Hi John, This is Panduranga.

I have a bit of computer trouble, and I've heard that you're good with computers. So would you mind taking a look at this for me?

So the thing is, I need to send my DBMS assignment to one of my lab mates, so I tried to format it and turn it into a PDF file, but it keeps getting sent as a text file for some reason, and when I try to open it, all I see are satanic symbols. Could you please take a look at it and try to recover the original file?

I'll attach the text file below

Thanks and regards,

Panduranga Prabhudesai
